Henry VIII became king in 1509 at the age of eighteen, after the death of his elder brother, Arthur, and quickly married his brother's widow, Catherine of Aragon, who had a daughter, but a female succession was problematic. After twenty-four years of marriage, Henry asked the Pope for an annulment, which would allow him to marry again. The Pope refused. The divorce from Catherine became the King's so-called "great matter".

Henry made a revolutionary decision: the English Church would separate from the Pope. Henry became the supreme head on earth of the Church of England, a divine ruler. His act stimulated the Protestant Reformation in the rest of Europe.

Pancake Day, or Shrove Tuesday, is a special day celebrated in English-speaking countries around the world. In France, the US and other countries, the same day is called Mardi Gras or Fat Tuesday. On Pancake Day many people eat pancakes.

Pancake Day is always on a Tuesday in February or March and is the day before Ash Wednesday, the start of Lent.

Lent is a period of forty days before Easter, when people often give up or stop eating things that are bad for them, like chocolate or fast food.

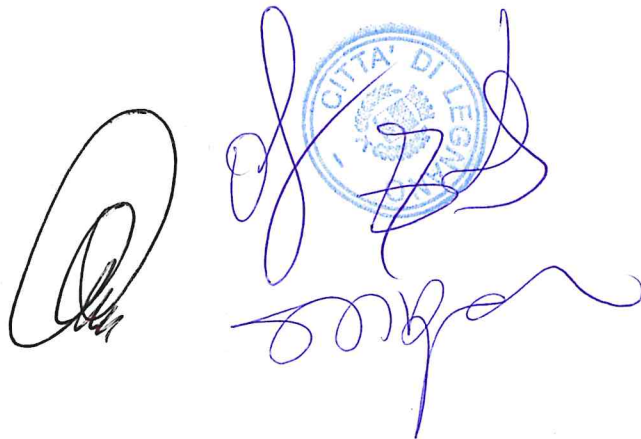

At the end of Lent is Easter. Easter takes place on a different date each year because it depends on the moon. Easter Sunday is the first Sunday after the first full moon of spring.

The isle of Wight was formed at the end of the last Ice Age, about eight to nine thousand years ago. The island is popularly known as Dinosaur Isle. It is one of Europe's richest sites for dinosaur remains.

The former royal residence, Osborne House, was built as a holiday home for Queen Victoria. It produced a boom in tourism on an island previously known for farming, fishing and boat building. This boom produced another boom in urban development, especially in resort towns.

Every August, the islanders hold a world-famous international sailing regatta.

Weather can affect our mood and even our behaviour. After weeks of rain, a sunny day can feel uplifting, while a return of dark clouds can bring on gloom and even depression.

When it's sunny, we tend to be in a better mood; sunshine lowers blood pressure, stimulates vitamin D production, which affects the immune system and also affects mood.

However, heat increases probability of people being violent and drinking more alcohol; it tends to make people angry and that leads to rioting.

The hotter it is, the angrier people get, more passionate, more romantic. Whereas the nearer we get to the Poles, the more staid, reserved they tend to be.
